PRODUCT DESCRIPTION

Designer: Arne Jacobsen

Louis Poulsen AJ Eklipta LED Ceiling / Wall Light

The AJ Eklipta LED Wall and Ceiling Light was first designed by the renowned Arne Jacobsen in 1959 for the Rødovre Town Hall, which Jacobsen also designed. The Eklipta is crafted from a metal structure and is fitted with an opal glass diffuser, which emits a soft and diffused glow that is welcoming and inviting. The AJ Eklipta has a simple and clean round design, making it versatile and suitable for many spaces to provide much-needed illumination.

The AJ Eklipta LED Light has an integrated LED light source, making it long-lasting and eco-friendly. Suitable for both domestic use and architectural projects, this light can be used in many interiors to add a classic and iconic touch and to provide an effective glow.

The Louis Poulsen AJ Eklipta LED Wall and Ceiling Light is also available in a retrofit lightbulb version.
