PRODUCT DESCRIPTION

Designer: Meneghello Paoletti Associati

Luceplan Nui Mini LED Outdoor Portable Table Lamp

The Luceplan Nui Mini LED Portable Table Lamp was designed by Marco Paoletti and Sandro Meneghello who founded Meneghello Paoletti Associati in Milan in 2007 and have used their designs to balance 'functionality and beauty'. This LED portable lamp is a perfect example, the modern minimalist design paired with the portability and integrated dimmer, this design is a showcase of innovation and practicality. The steel top, that conceals the LED light source and touch dimmer, is available in three finishes which are White, Sand and Greige. This is then mounted on top of a transparent crystal base that plays a 'game of reflections' with the ambient light. The concealed touch dimmer under the steel top can be used with ease by holding down the dimmer making the light gradually dim and when tapped the light will then turn off or on. This simple design allows you to manipulate the light output with effortless precision.

The Nui Mini LED portable is suitable for both indoor and outdoor use, with an IP rating of 54, this striking table lamp can be easily used throughout the home or in an outdoor setting. With a USB-C cable included, the rechargeable ability of this Nui portable light allows a cord free design that adds to its portable nature. When fully charged, this outdoor table lamp can emit a soft ambient light for 6 hours when on full brightness and for up to 12 hours when dimmed. Perfect for many different interiors and exteriors, the Nui Mini will add a striking design and endless functionality to any space.
