## PRODUCT DESCRIPTION

**Designer:** Tom Dixon

### Tom Dixon Copper Round LED Pendant

The Copper Round was designed back when the first LEDs were introduced, as a response to the greenish hue they emitted, aiming to create a more appealing light.

Over-sized with a reflective surface only accomplished through the technologically advanced method of vacuum metallisation. The Copper shade is blow moulded and part of the recent trend for copper in interior designs.

The Copper pendant is available in a copper or black finish, as well as two sizes. The Copper round collection is very versatile to create cluster and linear installations or as stand-alone feature pendant lights.

Cable Finish: Clear cable
