PRODUCT DESCRIPTION

Designer: Pablo Pardo

Pablo Pixo LED Wall Light

The Pixo LED wall light was designed by Pablo Pardo who has a 'less is more' philosophy when it comes to his designs. This LED wall lamp is a simplistic design with high functionality. The glare-free energy-efficient LED light source is 90% more efficient than a comparable halogen light source which is not only helpful for you but also for the environment. The adjustability and freedom of this design comes from the 360 degrees head and stem rotation that allows you to create task-driven focused light. The integrated dimmer on the head of the lamp also adds another level of adjustment so that you are able to create a task-specific light.

This Pablo wall light features an integrated USB port for charging smart devices. This feature is ideal for bedside tables and over desks. The Pixo LED wall light is also 97% recyclable and can be completely disassembled which makes fixing or transporting the light a lot easier.

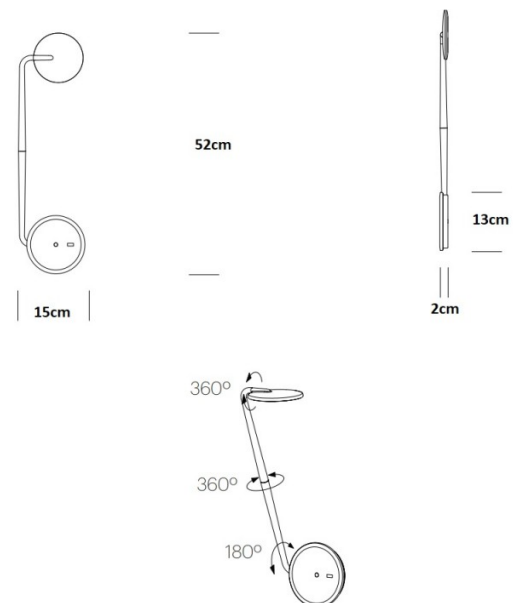

PRODUCT SPECIFICATION

Light Source: 6W, 3000K, 325 Lumens

IP Code: 20

Dimming: Integrated dimmer on the product.

Dimensions: Height: 52cm
Wall Mount: Ø13cm
