PRODUCT DESCRIPTION

Designer: Morten & Jonas

Northern Blush Rail LED Pendant Light

The Blush rail aims to revolutionise your lighting for home and work environments. With just one system, the Blush rail can transform dining rooms, office spaces, or hospitality venues. The steel metal frame gives this light a hardy exterior that brings a simplistic modern style to your home. The shades are fitted with small opal acrylic diffusers that create a clean glare-free light that beautifully provides an area with the perfect downward glow. Available in a selection of muted finishes that would fit elegantly into a kitchen, living room, or office. The monochrome black and white finishes are simple yet sleek and would easily match any style of home. The warm beige finish however creates more of a feature that brings a warm and earthy tone to the space, ideal for those cosy corners of your home. Also available in a 3 and 5 shade size option, the Blush rail pendant can be used for smaller spaces or even areas such as bars and restaurants.
