PRODUCT DESCRIPTION

Designer: Enzo Catellani

Catellani & Smith Ettoreino F LED Floor Lamp

The Ettoreino F floor lamp by Catellani & Smith is a retro-style, industrial task lamp that is ideal for a reading nook or workspace. The high level of adjustment within the mechanisms of this lamp allows for the head of the lamp to rotate 350 degrees around the stem and the stem to rotate 350 degrees around the base. This gives you a wide range of movement to be able to light every corner of your space. The height of this lamp is also adjustable from a minimum height of 103cm to a maximum of 165cm. This can allow you to provide an area with the perfect uplight or downlight or even indirect ambient light.

The light intensity of the Ettoreino floor lamp can also be altered using the dimmer switch on the stem of the lamp. With a press and hold, the dimmer switch will slowly decrease or increase the light intensity. This Catellani & Smith floor lamp is available in a black, white, or colourful finish that all highlight the skills and craftsmanship of this design. On all three finishes, the lamp features a small red dancing figure on the end of one of the adjustable stems. This red figure appears to be part of the overall mechanism of the floor lamp and demonstrates a fun playful side of Catellani & Smith.
