PRODUCT DESCRIPTION

Designer: Bønnelycke MDD

Design For The People Kaito Pro Ceiling Light

Designed by Bønnelycke MDD for Design For The People, the Kaito Pro Ceiling Light is the middle point where aesthetics and innovation join together. With a sharp and modern body, the Kaito Pro is easily adjustable by moving the head of the light. It is incredibly flexible and can be moved in any direction to illuminate the area of the room you believe needs it most. The subtle brass details that form the joint of the light add a burst of classic elegance to the design.

The light source of the Kaito Pro emits a soft light which is cast out through the large diffuser, resulting in a beautiful but powerful down light. This slim ceiling light is a beautiful fixture in hallways, kitchens, living areas and even storage rooms. They can also be utilised in public spaces such as offices, gyms, cafes and shops.
