PRODUCT DESCRIPTION

Designer: Tom Dixon

Tom Dixon LED Spring Surface Light

The Tom Dixon Spring LED Surface Light consists of overlapping stainless steel ribbons that are coated with a polished brass finish. These overlapping strips resemble a whisk and result in a beautiful shadow effect on the wall when the Spring is turned on. The custom made Tom Dixon LED disk sits inside of the arrangement and can be dimmed to personalise the ambience of your environment.

The structure of the Spring LED Surface Light can be easily adjusted into a variety of silhouettes, from a flat arrangement to a more fuller shape. The flexibility of the frame also ensures that the light can be easily flat packed for delivery.

Tom Dixon's custom LED light source is replaceable once it's initial life of 50,000 hours is up. This can only be sourced via Tom Dixon. Please [contact us](#) for more details.
