Astro Aria 300 Wall Light

The Astro Aria 300 is a minimalist plaster wall light designed to provide a soft, diffused glow across interior spaces. Its simple rectangular form measures 30cm wide and offers a timeless elegance that blends easily into a variety of decorative schemes. Crafted from high-quality plaster, it can be painted to perfectly match your walls, creating a seamless architectural effect.

The Aria 300 emits gentle up and down light, producing a warm and inviting atmosphere that works well in living rooms, hallways, and bedrooms. When paired with a dimmable E27 lamp, the fitting allows you to adjust brightness levels to suit the mood, from ambient washes of light to more practical illumination.

Built for versatility, the Aria is IP20 rated and suitable for bathroom zone 3, making it adaptable beyond general living spaces. Its durable plaster construction and customisable surface make it a favourite for residential interiors seeking discreet, modern lighting.
