PRODUCT DESCRIPTION

Designer: Christophe Mathieu

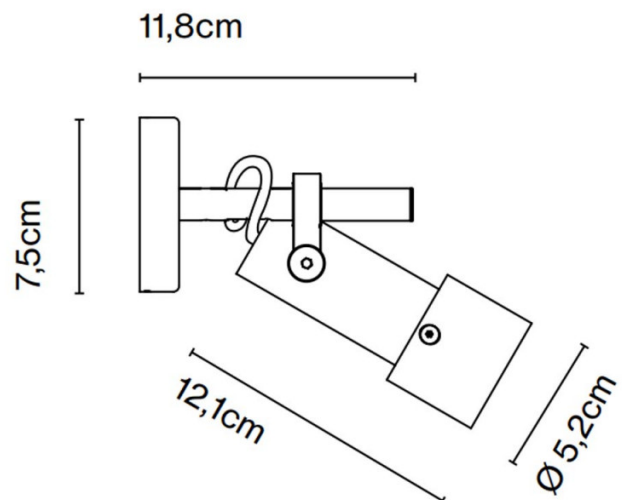

Marset Palosanto LED Exterior Wall Light

The Marset Palosanto LED Wall Light is a sleek and functional lighting solution for outdoor spaces, in both residential and commercial settings. Palosanto offers a directional light that can be manually rotated by up to 360 degrees. The exterior wall light also features a honeycombed grille which not only prevents any glare but also reflects the light source throughout the head of the light and allows some to escape via the back of the structure, this provides a subtle ambient indirect illumination. This glare cell comes included with the Palosanto Wall Light, but can be removed.

The Palosanto LED Exterior Wall Light was designed by Christophe Mathieu and is a new release for 2023, he wanted to create a lighting solution that accentuates the outdoors and reveals architectural details. The result is a compact, flexible, and hard-wearing wall light, that can withstand even tough climatic conditions.
