As its name might hint, the Rod Lamp was inspired by the construction rod. The rod stem connects the base and shade, like two imaginary blocks of cement; rising from the ground and supporting the shade. The LED light source is neatly placed within the shade, while a touch dimmer allows you to adjust its light intensity. Simply tap the top of the shade to turn on, dim and turn off the light. With an IP54 rating, the Rod can also be used in outdoor spaces. These characteristics make the Rod Lamp the perfect lighting solution for commercial spaces, like offices or restaurants.
