PRODUCT DESCRIPTION

Designer: Odile Decq

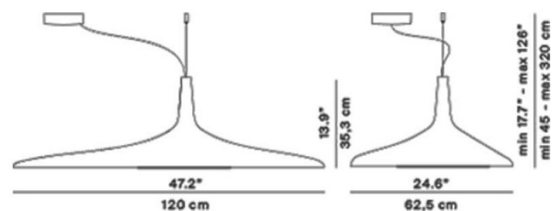

Soleil Noir Suspension by Luceplan

Soleil Noir is a modern day take on the classic chandelier, experimenting through a technological, futuristic vision. This LED suspension light is supported by a single cable and keeps its balance due to the thickness of the body. The LEDs are located on the small black disc in the middle of the design, where they are emitted into the white shade and reflected back into the room. Although an indirect light, the Soleil Noir ensures an even cast of brightness around your space.

Soleil Noir is French for 'Black Sun' a thoughtful name for this lamp that reminds audiences of a solar eclipse. The moon is demonstrated by the inner circle that reflects light onto the structure. Designed by Odile Decq, the Soleil Noir is a great depiction of slender aerial lighting that takes up little room whilst still having a large impact on your space. This luminaire is a great addition to your home or public space, a creative way to add a unique spin to your dining area, lounge, bar or restaurant.

PRODUCT SPECIFICATION

Light Source:	35W, 3000K, 1728 Lumens
