PRODUCT DESCRIPTION

Designer: Omer Arbel

76s Surface Light by Bocci

Suitable for application on the wall and the ceiling, the 76s surface lamp was designed by Omer Arbel as part of the [Bocci 76 Series](#). The ceiling/wall lamp has a metal mount and a glass lampshade that has layers of both white and clear glass that create a geometric pattern. The design is created by a vacuum pulling the glass layers through copper meshes that sit inbetween each layer.

An innovative and contemporary light, the 76s wall and ceiling lamp can be used in many rooms throughout domestic and commercial interiors. Whether you need to line a hallway or create an ambient glow in your lounge, this surface light will not disappoint and will create an eye-catching aesthetic in any space.
