PRODUCT DESCRIPTION

Designer: Enzo Panzeri

Panzeri Golden Ring Suspension

The Panzeri Golden Ring Suspension is crafted from aluminium, boasting a circular form that emits dual emission illumination and top and bottom high-transmittance opal polycarbonate diffusers. This rounded form is suspended by three steel cables and can be installed individually or in multiples for a more dramatic centrepiece. Available in a range of sizes and three sleek finishes, the Panzeri Golden Ring can adapt to a range of interiors. With a standard colour temperature of 3000K, the Golden Ring lights also offer the possibility of having LED 4000K upon request - perfect for interiors that require a more focused white light such as offices and workspaces.

The Golden Ring Suspension was designed by Enzo Panzeri and is one of the brand's staple products. It appears to be floating seamlessly in mid-air and can also be installed at angles to create playful compositions in your interior. Thanks to the IP40 rating, this suspension light can be utilised in slightly damp environments such as bathrooms and spas. It is a beautiful addition to open-plan kitchens, communal workspaces, reception areas, hotels and restaurants.

Please Note: this luminaire can also be supplied with an oversized 300cm structure. Please [contact us](#) for more information and pricing.
