### PRODUCT DESCRIPTION

**Designer:** Tom Dixon

### Tom Dixon Mini Melt LED Pendant Light

Mini Melt with its imperfect but nature-like shape is now available with an integrated LED ring light source. Available in 4 different finishes: gold, copper, chrome and smoke.

The Mini Melt light is injection blow moulded and finished with vacuum metallisation which it a mirrored effect when switched off. When on, the pendants take on the appearance of molten glass, creating an impressive optical display.

Melt pendants are also ideal as groups suspended from a multi-canopy to create a stunning display of melted orbs. Please [contact us](#) for further information and pricing regarding Melt clusters.

**The integrated LED light engine is replaceable. This can only be sourced via Tom Dixon. Please contact us for details**
