## PRODUCT DESCRIPTION

**Designer:** Pierre Charpin

### HAY PC Double wall light

The HAY PC Double wall light was designed by Pierre Charpin with the aim of providing focused light where needed. The functional design conceals gas springs that enable the arms and head to hold their position wherever they are moved. This functionality is paired with the artistic influence that Pierre Charpin brings to all of his designs. As a trained artist, Pierre's research on form and colour characterizes his work and this can be seen in the design of the HAY PC Double wall light. Pierre Charpin's designs have been included in exhibitions around the world and was elected Designer of the Year 2017 due to designs such as this elegant wall lamp.

This adjustable wall light features an integrated touch dimmer switch with a memory function that controls brightness levels and automatically turns off after five hours. This not only allows you to manipulate the light output with ease but also has the memory function so it will turn on at the exact brightness you have chosen. This task lamp can be used for workspaces or for reading chairs, with adjustable arms and brightness, the HAY PC Double wall light can be manipulated to any angle you need.
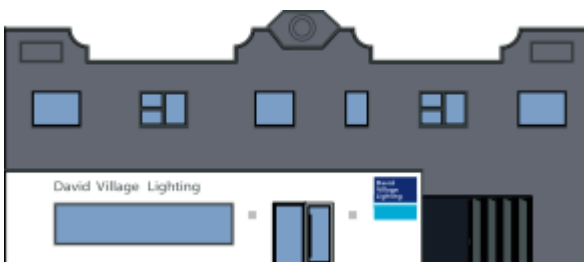

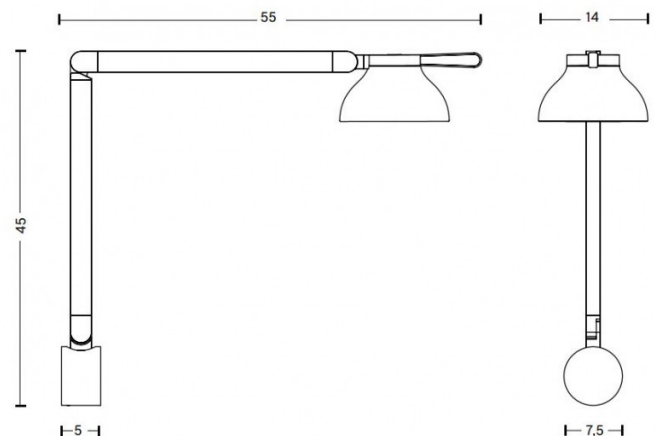

## PRODUCT SPECIFICATION
