PRODUCT DESCRIPTION

Designer: Johanna Grawunder

Wan Semi-Recessed Adjustable Spotlight by Flos

The Wan semi-recessed spotlight was designed by Johanna Grawunder for Flos in 2006 and as with the rest of the range, is designed to be used in series. This version of the Wan spotlight is adjustable with 360° vertical rotation, and a 60° pivot, and allows the user to change light direction post installation, unlike other models of the Wan.

The Wan semi-recessed spotlight has a body made from aluminium, and a shape inspired by a bowl, which is also the inspiration for the name - Wan means "bowl" in Japanese. The Wan adjustable spotlight provides directional, direct and glare free light emission, making it perfect for tasking.

This model is available in four colour finishes, chrome, white, black and green. The Flos [Wan collection](#) also includes a ceiling/wall fitting, a fully recessed model and a pendant light.
