PRODUCT DESCRIPTION

Designer: BIG

Artemide Gople Ceiling Light

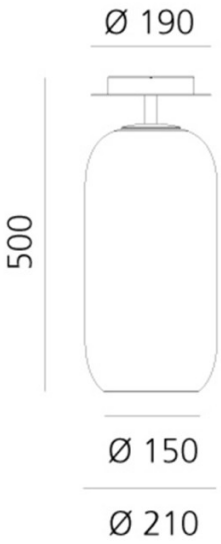

Artemide Gople Ceiling Light features a handmade blown glass diffuser paired with an aluminium ceiling base. Part of the Gople collection by BIG, Bjarke Ingels Group, the elementary shape brings that characteristic form to a compact ceiling fitting that gives a soft, diffused glow while keeping the visual focus on the glass.

Each white piece is unique, following a Venetian technique that fuses white glass with crystal during the glass-blowing process. Blue, copper, bronze and silver versions are made using a sustainable PVD metal vacuum deposition process, which gives the glass its distinctive finish.

Artemide Gople Ceiling Light is available in finish combinations including Black and Blue, Black and Bronze, or Black and Copper, alongside single glass finishes in Silver and White. Its close-to-ceiling format makes it well-suited to hallways, bedrooms and other interior settings where a softer ambient light is needed without the drop of a pendant.
