PRODUCT DESCRIPTION

Designer: Sebastian Summa

ORG W LED Wall Light by DCW éditions

The ORG wall light was designed by Sebastian Summa and is part of the DCW éditions ORG collection. The ORG family is inspired by science fiction and astronomy, taking the form of shooting stars with linear and graphic tubes. The wall light is made from glass and metal, with an opal white and brass finish which creates a mesmerising and magical look.

The ORG wall lamp can be used in many settings, whether you want to install horizontally or vertically, as a handy light, to line corridors or create atmosphere in a large room. The ORG has an integrated LED light source to produce an efficient glow which also spreads evenly as the source in concealed and diffused. Available in 2 sizes, the smaller ORG W 1050 and the larger ORG W 1500, you can mix and match versions to create variety and you could pair with other lights from the series for a coherent lighting design.
