PRODUCT DESCRIPTION

Designer: Astro Design Team

Astro Kuro Lantern Outdoor LED Portable Light

The Astro Kuro Lantern Outdoor LED Portable Light is a rechargeable portable lantern with a pared-back Textured Black finish. It includes a hidden LED that focuses light downwards and reduces glare, giving it a calmer and more controlled output than an exposed bulb lantern. The contemporary form is designed for outdoor use, but can also be used indoors thanks to its USB charging source.

Kuro comes in 250 and 450 sizes and can be charged by USB or by its solar panel. The 2700K LED gives a warm light, with three brightness levels for sitting outside, eating, or using it as a low light on a table. Battery life is listed as 5 to 12 hours, depending on the setting used.

Rated IP44, Kuro is suitable for outdoor placement and is made from aluminium with an integral touch dimmer. A full USB recharge takes around 5 hours, while solar charging speed depends on weather conditions. Please note that this product is not suitable for installation within five miles of the coast.

Best suited to garden tables, patios, terraces, balconies, outdoor dining, hotel terraces, and flexible indoor ambient lighting.

PRODUCT SPECIFICATION

Light Source: 1.3W, 2700K, 145 Lumens

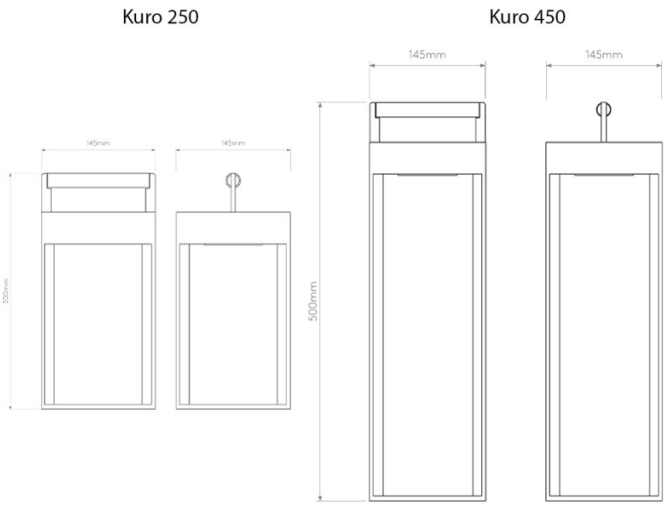

IP Code: 44

Dimming: Integrated dimmer on the product.

Dimensions:
