PRODUCT DESCRIPTION

Designer: Astro Design Team

Astro Kuro Lantern Outdoor LED Portable Light

Astro Kuro Lantern Outdoor LED Portable Light is a rechargeable portable lantern with an integrated 1.3W LED, a 2700K colour temperature and three brightness settings, combining solar charging with USB charging for flexible indoor and outdoor use. The concealed light source directs illumination downwards and reduces glare, which gives it a calmer, more controlled output than an exposed bulb lantern.

Available in 250 and 450 sizes, both versions are finished in Textured Black and made from aluminium, with an IP44 rating for outdoor placement. Battery life is quoted at between 5 and 12 hours depending on the brightness setting, and a full USB recharge takes around 5 hours. Astro notes that solar charging speed will vary with weather conditions, and that the product is not suitable for installation within five miles of the coast.

PRODUCT SPECIFICATION

Light Source: 1.3W, 2700K, 145 Lumens

IP Code: 44

Dimming: Integrated dimmer on the product.

Dimensions: 250:
Width: 14.5cm
