PRODUCT DESCRIPTION

Designer: Jean Prouvé

Vitra Petite Potence Wall Light

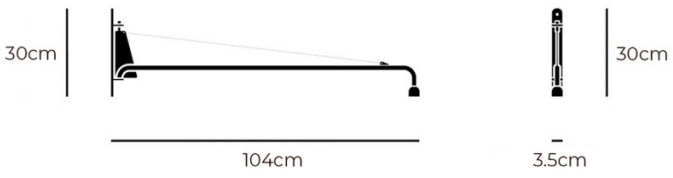

Designed by Jean Prouvé in the 1940s for his own home, the Petite Potence Wall Light is the smaller version of the **Potence Wall Light**. This lighting solution is characterised by its swivelling metal body that can be moved from side to side to direct the light where you want, making it highly functional. The pure and functional nature of the Petite Potence Wall Light makes it fresh and modern, despite being created in the 20th century, and it has enjoyed success for many decades.

An iconic design, the Petite Potence Wall Light is available in a range of colours, allowing you to find the right match for your design scheme. The design is also perfect for smaller interiors and works well as both an atmospheric and reading/task light. To add further to the luminaire's functionality, the Petite Potence is dimmable with an included dimmable light bulb and dimmer switch.

Please Note: This wall light is supplied with a cable and plug, and will need to be installed near a socket.
