GUBI

Stemplite Wall Light by Gubi

New for 2021, the [Gubi Stemplite collection](#) is extended with the Stemplite wall light, designed by Bill Curry. The wall lamp was first created in the 1960s and has been out of production for many decades. Now, Gubi are bringing it to the modern user by taking original drawings from Curry to produce this spectacular wall fixture.

The Stemplite wall lamp is reminiscent of the time it was created, being heavily influenced by the space age era of design that existed. The wall light, as well as the rest of the Stemplite lights, were very forward thinking at the time because they were formed from a single-contained unit and even featured on the original Star Trek TV series due to their innovation! The lamp sits at 90 degrees from the wall, seemingly branching out, holding a beautiful frosted glass lampshade that diffuses the light source. The light can be used in many settings for an effective and warm ambience, whether in the home or in a professional space. Available with a black chrome metal finish and a dimmer switch located on the wall base.

Designer: Bill Curry

IP Code: 20

Dimming: Integrated dimmer on the product

Dimensions:

Ø32cm shade

42cm height

34cm depth

Ø18cm wall base
