Delumina LED Wall Light by DCW éditions

Designed by Olivelab, the Delumina wall light is an innovative and fascinating fixture that plays with light and darkness in an alluring way. The wall lamp is made up of concentric circles, with a black inner circle and a transparent outer circle. The centre also has a black rod which can turn around, turning the inner circle from black to transparent to black again. The mechanism acts as a solar eclipse, bringing the natural wonder indoors for a mesmerising and captivating display.

The Delumina wall lamp is available in two sizes, the 250 which is comprised of three circles and the 320 which is larger and has two circles. The integrated LED light source sits behind the centre and is diffused outwards against the wall, producing a warm glow. You can use in multiple to line walls or alone for a smaller space in many types of settings. You can also match the wall light with the Delumina pendant light for a consistent design scheme.
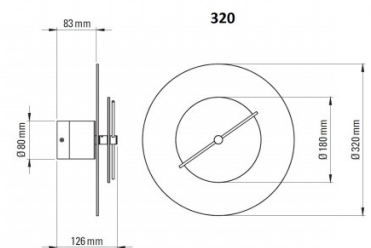

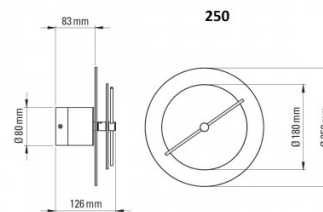

PRODUCT SPECIFICATION
