PRODUCT DESCRIPTION

Midnight LED Wall Light by DCW éditions

The Midnight wall light was designed by Stéphanie Cayet and is made from aluminium and glass, creating a contrasting pattern and look that draws the eye and juxtaposes dark and light. One side is made from glass, producing a translucent glow that diffuses outwards. The other side is made from black metal, where the integrated LED source rebounds off the back to create a circle of light.

The Midnight wall lamp is available in 2 sizes, the smaller Midnight 325 and the larger Midnight 505, and comes in either a solid or stripes version. The wall light can be used in a variety of settings, suitable for dining rooms, stairways, corridors, lounges and many more. You can use alone or in multiple and you could mix and match versions and sizes for a more varied yet consistent look.
