Astro Dartmouth Twin Wall Light

The Astro Dartmouth Twin Wall Light is a clean, contemporary wall light designed to cast illumination both upwards and downwards. Its simple geometric form makes it easy to use across a wide range of spaces, from bathrooms and hallways to patios and sheltered exterior walls. The combination of aluminium bodywork and clear glass detailing gives it a crisp, practical look that works particularly well in modern settings.

Rated IP54, Dartmouth Twin is suitable for use in bathroom zones 2 and 3 as well as outdoor locations where a more weather-resistant fitting is needed. The dual light output helps create both functional illumination and a softer sense of ambience, making it useful for circulation spaces, entrances and feature walls where a balanced wash of light is preferred.

Dartmouth Twin uses two GU10 lamps, sold separately, and is dimmable when paired with compatible dimmable bulbs. Made from aluminium and suitable for mounting on flammable surfaces, it is a versatile wall light for both residential and commercial projects.
