PRODUCT DESCRIPTION

Designer: Robbie Llewellyn

Bide LED Wall Light by Bert Frank

The Bide LED Wall Lamp is a beautiful and stylish light that is made from natural alabaster with a metal centre. Bide Wall Light has a circular stone lampshade that appears opaque when turned off and translucent when turned on. Its integrated LED light source sits in the middle producing a diffused glow that spreads outwards in a ring of light.

Bide Wall Light is available with either a brushed brass or a satin nickel centre and in a small, medium, large or extra large size. With an IP rating of 65, the wall lamp can be used in wet areas such as bathrooms, spas or swimming pools as well as many other settings. The two sizes and finishes can be mixed and matched to cluster together to create a gorgeous light display or can be used alone for smaller spaces. The wall light also comes with one adjustable wall fitting so you can you set the fixture at two different depths to stagger and create bigger wall modules where the light overlaps.
