PRODUCT DESCRIPTION

Designer: Tom Dixon

Tom Dixon Press Cone LED Pendant Light

A part of the [Tom Dixon Press Collection](#), the Press Cone LED Pendant is created by dropping molten glass at 1200°C before pressing it in iron moulds and forming it under immense pressure. This result is a beautiful yet durable glass lampshade which holds an integrated LED light source at its core, diffusing the illumination into the room and creating playful ripples on the surrounding area.

The Tom Dixon Press Cone Pendant is named aptly due to its silhouette that is reminiscent of children's toys, this luminaire can be utilised in a wide range of settings. The Press is a beautiful way to create a welcoming ambience and can be used as a feature light, especially when displayed in multiples. You can also match the pendant light with others from the [Press Collection](#) to create a seamless light scheme throughout your interior, immediately adding a contemporary touch to any space.
