PRODUCT DESCRIPTION

Designer: Christian Flindt

Louis Poulsen Flindt Bollard LED Outdoor Light

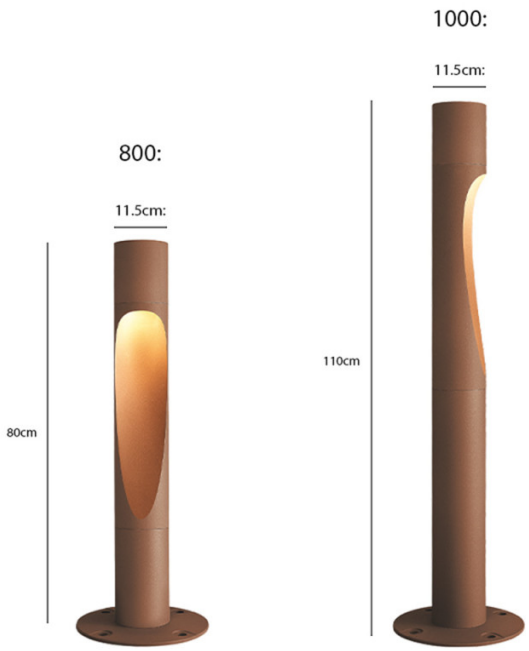

The Flindt bollard was created as part of a project in 2011, where Louis Poulsen was a part of a collaboration to illuminate the park area of the Brænderigården centre in Viborg, Denmark. After a prototype was shown in a 2012 exhibition and received an overwhelming response, the brand took the next step to develop a product to sell.

The Flindt outdoor bollard is characterised by a minimalist aesthetic, having straight lines with an integrated light source, which sits at the top. The light shines down and is highlighted by the stylish indent on the body, creating a warm and pleasant glow. Suitable for lighting paths, garden spaces, patios and more, the Flindt LED bollard comes in two sizes, two colours and can be installed into the ground with a variety of bases for different applications.

The Flindt LED outdoor bollard is also available with a 4000K colour temperature and night-time dimming function. To discuss further options and prices, please contact us.

PRODUCT SPECIFICATION

Light Source:	12W, 3000K, 576 Lumens
