PRODUCT DESCRIPTION

Designer: Christian Flindt

Louis Poulsen Flindt Garden Bollard LED Outdoor Light

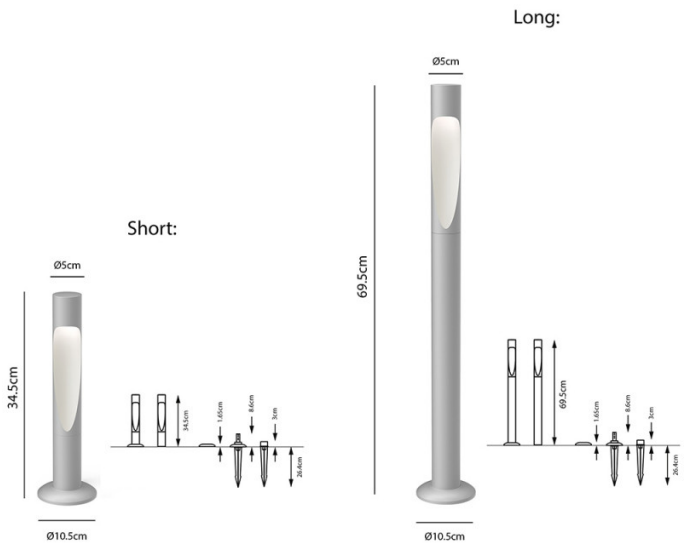

The Flindt garden bollard is a downscaled version of the **Flindt Bollard** which was first developed in 2011. The design was created from a project that sought to light a park area next to the art hall Kunsthal Brænderigården, as an exhibition was being held there. After the design found success in the years following, Louis Poulsen, alongside Christian Flindt, developed it further to create a whole range.

The Flindt garden bollard light has an integrated LED light source which sits at the top, pointing downwards, reflecting off the gorgeous indent detail. The slimline nature and contemporary aesthetic make it a very stylish choice for outdoor areas, and it is available in a short or long size to suit your needs. The garden bollard comes in a corten or aluminium colour finish and will modernise any exterior whilst providing an effective glow.

This outdoor bollard can be installed on many types of ground and surfaces because of the different bases available to purchase. Please contact us to discuss further and for prices. Also available with a 3000K or 4000K colour temperature.

PRODUCT SPECIFICATION

Light Source:	6.5W, 2700K, 252 Lumens
IP Code:	65
Dimming:	Non-Dimmable.
Dimensions:	**Short**: Ø5cm Height: 34.5cm Base: Ø10.5cm **Long**: Ø5cm Height: 69.5cm Base: Ø10.5cm
