PRODUCT DESCRIPTION

Designer: Poul Henningsen

Louis Poulsen PH 3-2½ Bollard Outdoor Light

The Louis Poulsen PH 3-2½ Bollard is based on the infamous three-shade system developed by Poul Henningsen in the 1920s. The system consists of three shades that are stacked on top of one another to create an anti-glare glow that is warm and direct. The light casts down out of the lampshade, creating a lovely play between light and shadow, generating a cosy ambience.

This system is now applied to an outdoor bollard, which is wonderful for lining driveways, pathways and gardens thanks to its IP44 rating. Available in a black colour finish, the PH 3-2½ outdoor bollard can be used in many settings and design schemes to add a timeless and elegant touch to your exterior.
