PRODUCT DESCRIPTION

Designer: Philippe Starck & Eugeni Quitllet

Kartell A.I. Stool

The Kartell AI stool expands upon the innovative **Kartell A.I Chair** by offering a stool version in two sizes. The stool is created using artificial intelligence and is the solution to the question asked by designer Philippe Starck: can we create a fully functional and comfortable seat with the least amount of materials possible?

The A.I stool is made from recycled technopolymer, being a sustainable and eco-conscious piece of furniture that is enduring and made to last. The stool is available in three colours, grey, white or black and in two sizes. The 99cm stool has a total height of 99cm and a seat height of 65cm, and the 108cm stool has a total height of 108cm with a seat height of 75cm, so you can find the right fit for your space. Use for kitchen islands, bars and high tables in homes, hospitality venues and public spaces. Suitable for both indoor and outdoor use.
