PRODUCT DESCRIPTION

Designer: Enzo Catellani

Catellani & Smith Petits Bijoux LED Pendant Light

The Petits Bijoux Pendants were created as a representation of 'static movement' and specifically the effect of an action that seems to imitate the gesture of throwing a stone into a pool of water. This can be seen in the rippling effect that is replicated by the layered brass rings.

The sphere shape of this elegant pendant light is used to emit the idea of infinite and perfection within the design. This also enables the design to have the same enchanting effect wherever the point of view may be coming from. Each brass ring is scattered with delicate LED lights, the 28 having 28 lights and the 56 having 56. Each light is individually diffused beautifully by an intricate transparent diffuser that clips over each light source with a detailed brass clip. These diffusers almost appear to be creating the illusion of light droplets dripping off the brass metallic rings.

Perfect as a centerpiece in a dining area or as a cluster over a staircase, these pendants add an elegant touch to a space and attract the attention of a room with ease.
