PRODUCT DESCRIPTION

Designer: Mathias Hahn

Marset Scantling Wall Lamp

Marset Scantling Wall Lamp is an adjustable wall light by Mathias Hahn, made from a lacquered iron structure, solid oak arm, and lacquered aluminium shade. The design uses simple geometric shapes, with the warmth of oak set against the more precise metal parts. This gives Scantling a clear, practical look without making it feel too technical.

The wall version is built around a flexible arm and fully rotational shade, using ball joints to hold the light in position without visible springs or counterweights. The small wooden handle makes the shade easy to move, so the light can be aimed towards a book, bedside area, desk, or seating position. This makes it useful where a wall light needs to work more like a task lamp than a fixed decorative fitting.

Scantling Wall Lamp is hardwired and available in Black or White finishes, both paired with oak detailing. The switch is built into the wall plate, keeping the light simple to use beside a bed, desk, or reading chair. Most suited to bedrooms, bedside areas, desks, reading corners, living rooms, lounges, hotel rooms, and interiors where an adjustable wall light can provide focused task or reading light.

PRODUCT SPECIFICATION

Light Source:	1 x Max 8W E27 LED Reflector (Excluded)
IP Code:	20
Dimming:	Integrated on/off switch on the product.
Dimensions:	Base: Ø13.5cm Depth: 26.8cm Shade Length: 19.5cm Shade: Ø9.5cm
