PRODUCT DESCRIPTION

Designer: Tom Dixon

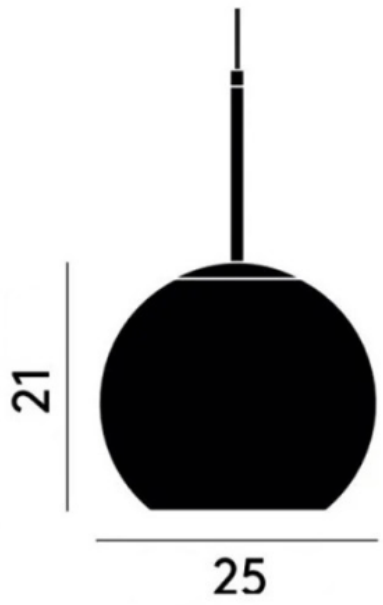

Tom Dixon Copper Round LED Pendant

The Tom Dixon Copper Pendant was released when LED light solutions were just beginning to appear on the market. Tom Dixon wanted to create a solution to the greenish hue they emitted, aiming to create a more appealing light. The Copper Round LED Pendant intends to create an extravagantly proportioned spotlight with a reflective surface only accomplished through the technologically advanced method of vacuum metallisation. The polycarbonate shade is blow moulded and leans into the popular trend for copper tones in interior design.

The Copper Round LED Pendant by Tom Dixon can be displayed individually or grouped together for more eye-catching configurations. Thanks to the downward-directed spotlight, this luminaire is a stunning addition to modern spaces, especially above workspaces, coffee tables, dining tables and kitchen islands.
