PRODUCT DESCRIPTION

Eclipsi LED Ceiling / Wall Light by Estiluz

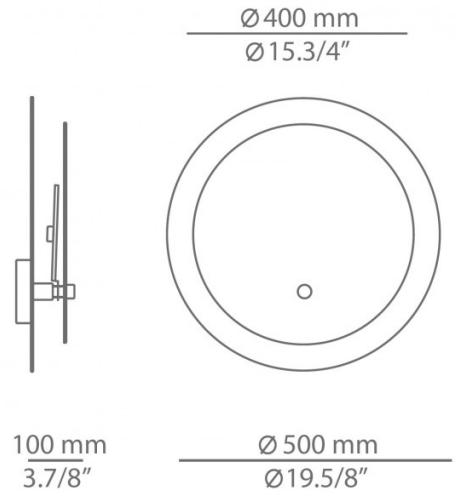

Designed by Josep Lluís Xuclà, the Eclipsi wall/ceiling lamp is an interactive fixture that plays with light and shadow. The ceiling/wall light is made from two metal discs, with the front one being able to move around a pivot so you can create your own personal eclipse. The movement of the shades creates a soft, indirect light that can be used in many interiors.

Available in a white colour finish, the Eclipsi wall and ceiling light can be applied onto any wall or ceiling to create a warm atmosphere. Suitable for use in homes, offices, hospitality spaces and professional settings, the Eclipsi will produce a beautiful and mesmerising effect.

The Eclipsi LED ceiling/wall lamp is available to purchase with a personalised laser-cut signage as shown in the last image above. Please contact us for more info and prices.
