Designer: Edmondo Testaguzza

Karman T-Black Pendant Light

The T-Black pendant light by Karman was designed by Edmondo Testaguzza who uses his extensive research to produce simplistic, yet unique, pieces of art and design. These Karmon pendants use a tactile outer material made of stoneware that not only makes the lamps appear rustic and primordial but also provides a unique sensorial experience.

The T-Black pendants can be used as a striking singular item or a stunning cluster. Available in three different shapes, this dynamic and modern pendant light can add a tactile touch and fascinating feature to any interior. The inside of these Karman pendant lights is a bright white enamel that reflects the light outwards with ease. The juxtaposition of the rough stone-like dark outer surface and the smooth white enamel inner surface creates a bold statement. Perfect for over a coffee table or kitchen workspace, the T-Black pendant uses its choice of materials to elevate its design.

PRODUCT SPECIFICATION
