PRODUCT DESCRIPTION

Designer: Matteo Ugolini

Karman Moby Dick Suspension Light

The Moby Dick suspension light was designed by Matteo Ugolini who aims for his designs to excite and create emotion within a space. This is certainly true with the Moby Dick suspension lights. Designed to look as though it is a wave upon the sea and emulate the white foam with its rugged edges and bright white appearance. This design uses fiberglass to make the light appear to be floating effortlessly in the air.

Karman states that all of their designs use 'tradition and modernity inspired by research and great technical skills to create beauty'. This is obvious with the Moby Dick suspension light. A larger size is also available, contact us for further information.
