PRODUCT DESCRIPTION

Designer: Pablo Pardo

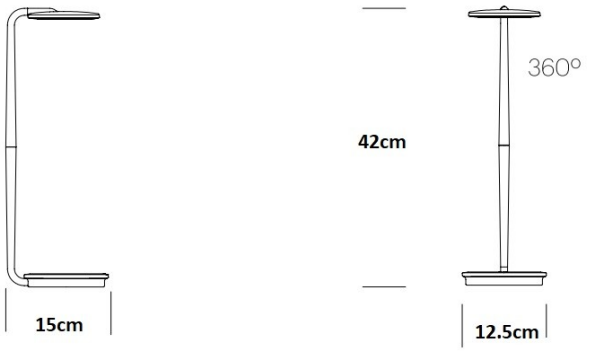

Pablo Pixo Plus LED Table Lamp

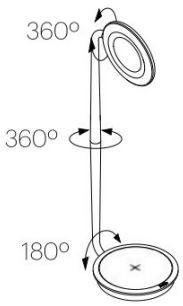

The Pixo Plus LED was designed by Pablo Pardo who has a 'less is more' philosophy when it comes to his designs. This LED table lamp is a simplistic design with high functionality. The glare-free energy-efficient LED light source is 90% more efficient than a comparable halogen light source which is not only helpful for you but also for the environment. The adjustability and freedom of this design comes from the 360 degrees head and stem rotation that allows you to create task-driven focused light. The integrated dimmer switch on the head of the lamp also adds another level of adjustment so that you are able to create a task-specific light.

The Pablo Pixo Plus table lamp is available in eight finishes, white, graphite, graphite with brass, white with brass, silver, azure, glow, and orange. The monochrome colours are sleek and modern with a touch of elegance with the brass finish. However, the three vibrant colours (azure, glow and orange) are a playful and modern addition to any space. The Pablo Pixo Plus LED table lamp is also highly functional and includes useful features such as a USB port and a wireless induction charger on the base. These features make this Pablo lamp a perfect addition to a desk or side table, the compact base leaves lots of desk space and adds a helping hand to productivity. This lamp is also 97% recyclable and can be completely disassembled if it ever needs fixing or transporting.
