PRODUCT DESCRIPTION

Designer: Studio 0405

Apollo Portable Lamp by HAY

The Apollo portable lamp was designed by Studio 0405, a Copenhagen-based design firm that seeks to develop design culture's history and form through new objects. This can be seen in the Apollo as it uses a classic silhouette which is contemporised through the use of opal glass and modern light technology. The portable table lamp has curvaceous and smooth lines, with a lampshade that conceals the light bulb to produce a warm and diffused illumination.

The Apollo portable light comes in a simple white opal glass finish and features a touch dimmer on the base of the lamp which controls the light intensity in three steps. The portable light is also suitable for outdoor use, so you can carry it all around your setting for effective lighting. Lasting for a minimum of 10 hours after being fully charged by the included charger cable, this gorgeous handmade lamp is wonderful for use in homes, hospitality and professional spaces.
