PRODUCT DESCRIPTION

Designer: Formafantasma

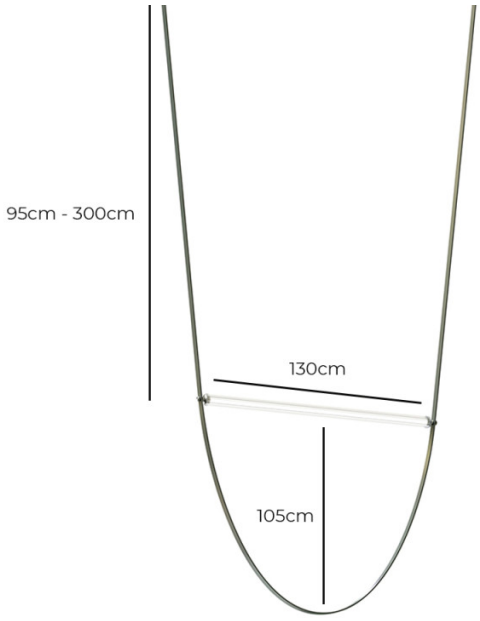

Flos Wireline LED Suspension

Created by design duo Formafantasma, formed of Andrea Trimarchi and Simone Farresin, who are based in Amsterdam, the Netherlands. Their design process aims to produce something new and original; they do this through experimentation. They created the Wireline through this process: 'Experimentation is an integral part of our work- When we begin a project, we don't necessarily have an idea of where we will end up'. The design of the LED Wireline suspension demonstrates a contrast between industrial rubber and sophisticated glass. The rubber acts as the power cable that connects the LED module to the sleek, modern ceiling canopy. This rubber belt that loops down is available in a cheerful pink or forest green. Both of these finishes highlight the elegance of the sophisticated glass.

This Flos suspension light can be installed as a singular piece that will act as a stand-alone statement. However, you can also use repeated modules that hang at different heights and lengths. This allows you to create elaborate compositions within your space that demonstrate the simplicity and technicality of this stunning design. Ideal for spaces with high ceilings or above staircases and dining tables, the Flos Wireline is a simplistic statement individually and as a cluster.

PRODUCT SPECIFICATION

Light Source:	45W, 2700K, 2793 Lumens
IP Code:	20
Dimming:	1-10V / Dali / Push to make dimming systems. Please consult your electrician, additional wiring may be required on-site.
Dimensions:	Width: 130cm Maximum Drop: 170cm - 400cm
