## PRODUCT DESCRIPTION

**Designer:** Studio Shulab

### Malamata Wall Light by Luceplan

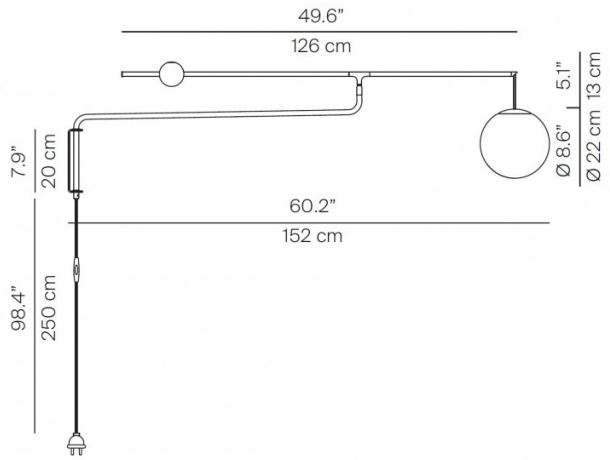

A part of the Luceplan Malamata collection, the Malamata wall light features an intuitive counterweight that allows the user to move the glass lampshade up and down. Deriving its name from the Hebrew term for 'up and down', the design duo Studio Shulab pay homage to their Isreali heritage and upbringing.

The wall light can be moved up and down by pressing the button on the metal sphere located on the rod and then sliding it across to the desired position. The shade is made from glass, ensuring a nice, diffused glow that is warm and welcoming. Available in matt black or brushed brass, the Malamata wall lamp also comes with a dimmer switch to control the ambience and can be used in a wide variety of interiors.

**This wall lamp comes with a cable and plug and must be installed by a socket.**

## PRODUCT SPECIFICATION

| | |
