PRODUCT DESCRIPTION

Designer: Foster and Partners

Artemide Takku Portable LED Table Lamp

The Takku Portable Light was designed by Foster + Partners, an international design studio which has been creating products since 1967. Always wanting to produce a design that is made well and responsibly, the Takku is no exception, with a robust yet elegant form which has smooth lines and an organic silhouette. The table light is made from aluminium and features a methacrylate diffuser to disperse the light source and create a warm glow.

The Takku LED Portable is the perfect solution for work and living spaces, with the ability to be carried around your entire interior for handy and functional lighting. The table lamp comes with an integrated dimmer switch on the stem so you can adjust the light intensity in three steps. The portable lamp also charges using the included USB-C cable and lasts for up to 32 hours when on the lowest light intensity. Available in six chic colours to suit all your needs.
