PRODUCT DESCRIPTION

Designer: Héctor Serrano

a-emotional light Woods Pendant Light

Designed by London-based studio Héctor Serrano, the a-emotional light Woods pendant brings all the wonder and beauty of light in the forest, emulating the magical look of light peering through the trees. The lampshade is made from slats of birch which are suspended vertically to produce a stunning show of shadow and light. The light source sits in an inner glass diffuser that radiates light through a dense grove of birch wood.

The a-emotional light Woods pendant can be installed in multiples to create a visual display in settings such as restaurants and bars. Within the home, The Woods can be installed as a feature to create ambient lighting in a bedroom or living room. The direct downward light from the pendant means that it is also effective when installed above surfaces such as a kitchen island or dining room table.

Please note that the cables are non-adjustable
