PRODUCT DESCRIPTION

Designer: Verner Panton

Louis Poulsen Panthella 160 Portable

The Panthella Portable V2 is a smaller, rechargeable version of the [Panthella table lamp](#), which was originally designed by the iconic Verner Panton in 1971. The Panthella Portable table light features a gorgeously organic silhouette with alluring curves that can both draw the eye and subtly fit into any design scheme.

With several finishes to choose from, the Panthella LED Portable lamp updates the design with an IP44 rating, allowing for indoor use and outdoor use on a calm and still evening. The lamp now takes replaceable and rechargeable AA batteries and is rechargeable using the included USB charger cable or by using induction wireless charging. The table lamp also features a dimmer switch on the base that can step dim to three light intensities or can be held down to set a fixed light level. Use in a wide variety of settings, whether at home, at work, in hospitality venues or commercial spaces for effective, useful and stylish lighting.
