PRODUCT DESCRIPTION

Designer: Enzo Catellani

Catellani & Smith Ale C LED Ceiling Light

This LED ceiling light by Catellani & Smith features a bold and simplistic silhouette that creates a talking point within a space. The hemispherical iron shade produces an upward beam of light onto the ceiling and illuminates the structural elegance of the design. The two straight aluminium tubes that hold the shade in place create a beautiful contrast between the smooth spherical shade and the straight-angled metal rods that bring a geometric touch to the overall design. The upward beam also illuminates the stunning wall mount made of two circular cylinders of contrasting sizes. In the colourful and fluo finishes, these cylinders are also in contrasting colours as they highlight the bold geometric shapes used in the design of the Ale C ceiling light.

Ideal for placement in a hallway, dining or living space, the Ale C ceiling light brings a unique touch to any space and provides a stunning ambient indirect light that floods a room. Available in four finishes, white, black, colourful and fluo, the Ale C ceiling light can be as quirky and colourful as you dare. Add a bold colourful feature to your space or bring a classic monochrome touch to your home, the Ale C is a modern and stylish design perfect for your space.
