PRODUCT DESCRIPTION

Designer: Enzo Catellani

Catellani & Smith Ettorino T LED Table Lamp

The Ettorino T table lamp by Catellani & Smith is a highly adjustable task lamp that is available in a black, white, and colourful finish. The LED light can be easily dimmed using the in-line dimmer on the cable. This makes adjusting the angle and intensity of the lamp easy and precise. Not only does the shade rotate 350 degrees around the stem, but the stem also rotates 350 degrees around the base. This gives you a wide range of adjustability and potential for lighting as many corners of your workspace as possible. The lamp can also be adjusted with its height, from 28cm to 90cm. With all these areas for adjustment, this lamp is the ideal table lamp for tasks and workspace lighting solutions.

This Catellani & Smith table lamp features a fun addition to the design that sets this lamp apart and creates a quirky touch to the overall appearance. A small red dancing figure is placed within the mechanism of the lamp and in all the finishes, white, black and colourful, brings a playful touch to the design. Place this lamp on a workspace, desk, or as a talking point within a room.
