PRODUCT DESCRIPTION

Designer: Enzo Catellani

Catellani & Smith Sfera W LED Wall Light

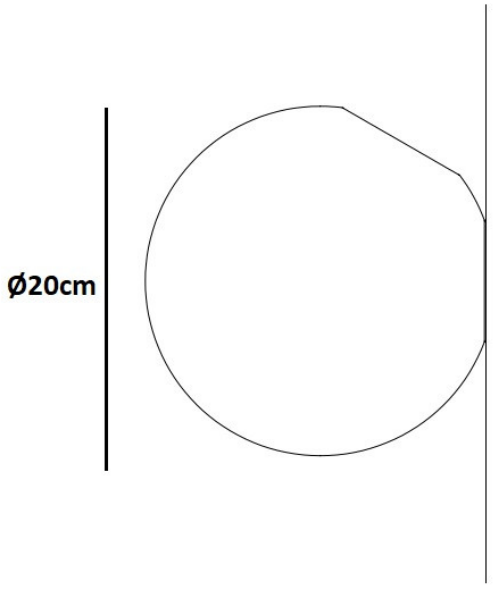

The Sfera wall light by Catellani & Smith is a stunning fixture that would make a statement wherever it is placed. The reflective nickel finish creates a highly mirrored surface that would reflect and highlight the natural beauty of the environment around it. The Sfera wall light houses a unique LED uplight that beautifully brightens the space above the mirrored dome. However, the mirrored effect also means that the Sfera brings an artistic touch when both switched on and off.

The reflected surface of Sfera creates an interplay of light that diversifies the space when used individually as a statement piece or as an impressive cluster of wall lights. Ideal for a decorative feature within a living space, hallway, or kitchen where the design and materiality of this wall light can be fully appreciated. However, the bright LED uplight is a stunning and functional feature that makes it a perfect fit on a staircase or a living space with high ceilings.
