PRODUCT DESCRIPTION

Designer: Giulia Archimede

Catellani & Smith Talismano LED Table Lamp

The Talismano is a stunningly unique table lamp designed by Giulia Archimede in collaboration with Catellani & Smith. This colourful lamp features an iridescent glass shade that is set into a brass structure creating an almost magical appearance. The glass shade is illuminated by a flexible integrated LED within the brass frame which highlights the stunning nature of this handcrafted glass. Developed after lengthy experimentation and complex workmanship, this iridescent glass is created by a method featuring many stages of skill and artistry. Placed within the luxurious brass structure, the glass has a distinctive effect that makes every single lamp unique.

A feature of this Catellani & Smith Talismano that makes it an eye-catching talking point within a space is the two-sided nature of the glass. On one side of the glass is an amber firey ombre of orange and on the other side is a vibrant wash of marine blue that creates an air of calm. As your mood or the space changes, so can the Talismano. Perfect for a bedside or a tranquil area of your home, the Talismano LED table lamp makes a statement wherever it is placed.
