PRODUCT DESCRIPTION

Designer: Daniel Schofield

Audo Copenhagen Ray LED Portable Lamp

The Audo Copenhagen Ray Portable Lamp was designed by Daniel Schofield, a graphic designer and carpenter based in London and Copenhagen, who finds beauty in simplicity. This is clear within the design of the Ray Portable, which takes its cues from old mining lamps with their distinct silhouettes and sturdy nature. This stunning Scandinavian design is available in two colours, black and dusty green, both of which complement their surroundings beautifully and bring Nordic minimalism to your space.

The Audo Copenhagen Ray Portable Lamp is made of a lightweight powder-coated aluminium base and shade that features a practical top handle that encourages you to pick up the Ray and take it wherever you go. Once charged, this portable lamp can provide up to 30 hours of light on 25% brightness and 11 hours of light on 100% brightness. This gives you the freedom to bring light wherever you go! With the included magnetic USB charger, the Ray table lamp by Audo Copenhagen can easily be charged up and taken indoors and out to be enjoyed wherever you are. Place this lamp as a stunning feature on a shelf or bedside, or take the Audo Copenhagen Ray Portable outdoors to brighten up your garden or patio.
